

Training on the latest DfE Guidance on "Supporting Pupils at Schools with Medical Conditions"

The Management of Medication in Schools & Childcare Settings

Level 1 on-line distance learning course

All courses are One Awards accredited

Issue 10

The New Accredited Level 1 Distance Learning Course

The Level 1 distance learning accredited course is designed to train staff in the key aspects of the latest DfE guidelines.

Working with One Awards we have created an on-line distance learning version of the popular Level 1 venue based one-day course. This option is ideal for staff who need accredited training and prefer the option of self teaching at their own pace. The course will equip staff with the practical knowledge and information they need to implement the Guidance and examine, assess and improve their own current practice.

Created by the UK's leading experts in the management of medication and controlled drugs in education settings, this training covers the key aspects of this subject that you will need in your setting.

How the Level 1 Distance Learning Course Works

The normal Level 1 course material has been much expanded to support distance learning and has been designed especially for personal study and for delegates to work through at their own pace. The accreditation test paper is supplied and students need to complete the test paper and submit it to us within 1 year of registration. Successful students will receive their certificate from One Awards to show that they have taken the accredited Managing Medication course and met the required standard.

Of course help for students is at hand by phone or email. Call or email us for more information

LEVEL 1 DISTANCE LEARNING COURSE COST

£165 + VAT per delegate
Accreditation included in the cost

The Management of Medication in Schools & Childcare Settings

Level 2 on-line distance learning course

All courses are One Awards accredited

Issue 10

The New Accredited Level 2 Course

The old three-day Level 2 training course was too expensive and time consuming for many school staff and school leaders.

So working with One Awards we have created an on-line distance learning version of the course which is fully accredited to the same level as the old 3 day course. **The Level 2 accredited course will provide staff with the most complete Managing Medication information, training, implementation and support package available in the UK.** For those staff seeking more intensive and detailed training it will provide the highest level of understanding of this topic, providing the fullest explanation of the concepts, ideas and implementation of the latest DfE Guidance on Supporting Children in schools with Medical Conditions and safety with medicines in schools.

Created by the UK's leading experts in the management of medication and controlled drugs in education settings, this training covers every aspect of this subject that you will need in your setting.

How the New Level 2 Course Works

The much expanded and much improved course material has been designed especially for personal study and for students to work on at their own pace. You will then need to complete and send us the supplied worksheets satisfactorily to obtain the level 2 accreditation. You can take up to one year to send us the material. Successful students will receive their certificate from One Awards to show that they have taken the accredited Level 2 Managing Medication course and met the required standard.

And of course help is at hand by phone or email if you need it.

So you no longer have to take three days out of school and you can save substantially on course fees. Call or email us for more information.

LEVEL 2 DISTANCE LEARNING COST

£375 + VAT per delegate Accreditation in included in the cost
